

Rhythm Shokeen

imrhythmshokeen@gmail.com | +91 8826277027 | Portfolio | GitHub | LinkedIn | Delhi, India

Professional Summary

Computer Science student specializing in Artificial Intelligence and Machine Learning with experience in research-driven engineering, machine learning systems, backend development, and process optimization. Worked on AI applications in supply chain analytics, computer vision, autonomous systems, and distributed platforms through research collaborations, industrial internships, and scalable software projects.

Technical Skills

Programming: Python, C/C++, JavaScript, TypeScript, SQL

Frameworks: FastAPI, Node.js, React, Next.js

Machine Learning: Machine Learning, Deep Learning, NLP, Computer Vision, Process Mining, Predictive Analytics

Databases: PostgreSQL, MongoDB, Supabase, Firebase

Cloud & DevOps: AWS EC2, Docker, Git

Tools: Linux, VS Code, REST APIs, CI/CD fundamentals

Experience

Founder | The GameOn Co.

Dec 2025 – Present

Link: the-gameon-co.vercel.app

- Founded a sports technology platform connecting athletes, coaches, and organizations through verified competitions and structured performance profiles.
- Designed and built the full-stack platform architecture including backend APIs, competition management systems, and athlete performance tracking.

Research & Development Intern | Siemens Energy

May 2025 – July 2025

- Developed machine learning and computer vision solutions for engineering workflow automation and industrial data analysis.
- Built Python-based analytical pipelines and data processing tools to improve operational efficiency and technical evaluation processes.
- Worked on applied AI solutions involving structured engineering datasets, automation workflows, and scalable analytical systems.

Technical Operations | TechIdeate MUJ

Dec 2025 – Feb 2026

Head of Content, Media & Editorial | IEEE AESS MUJ

Jul 2025 – Jan 2026

Content and Social Media Team | MUJHackX

Apr 2025 – Dec 2025

Member | Google Developer Groups — Manipal University Jaipur

Oct 2024 – Apr 2025

Intern | Indian Institute of Technology Delhi

Oct 2023 – Dec 2023

- Assisted in technical and research-oriented activities involving analytical problem-solving and engineering workflows.

Research & Publications

◦ **Research Contributor — Indo-Swiss Research Initiative**

Contributing to research on AI-driven process mining and resilient supply chain optimization under an Indo-Swiss collaborative research grant.

◦ **Research Paper (In Preparation)**

Research paper focused on process mining, supply chain intelligence, and AI-driven operational optimization under the Indo-Swiss research initiative.

- **Book Chapter Author (Submitted)**

Perception, Intelligence, and Autonomy: ADAS Features and the Autonomous Driving Software Stack

- **Book Chapter Author (Submitted)**

AI-Driven Process Mining for Sustainable and Resilient Supply Chain Management

Projects

- **NodeNet — Secure WebRTC File Transfer System**

Built a peer-to-peer encrypted file transfer platform using WebRTC, FastAPI, and room-based signaling architecture with secure real-time communication and scalable backend infrastructure.

- **P&ID Component Detection System**

Developed a computer vision pipeline using YOLO-based object detection for identifying engineering components in P&ID diagrams across PDF and DWG formats for industrial automation workflows.

- **HyperDock — Cargo Optimization Backend**

Designed and implemented a FastAPI-based backend system for cargo storage optimization using structured data processing, API-driven architecture, and logistics-focused computational workflows.

- **Fake News Detection System**

Built an NLP-based machine learning model for news credibility classification using text preprocessing, feature extraction, and supervised learning algorithms.

Education

B.Tech Computer Science (AI & ML)
Manipal University Jaipur

2024 – 2028

Certifications

- Accenture Nordics Software Engineering Job Simulation — Accenture (2025)
- Deloitte Australia Cyber Security Job Simulation — Forage (2025)
- Trifecta — MUJ ACM Student Chapter (2025)
- JPMorgan Chase & Co. Excel Skills Job Simulation — Forage (2024)
